TAIWAN

Foot-and-mouth disease continues to plague the Taiwan pork industry. An occurrence of foot-and-mouth was reported in December, 1998. The government has offered financial incentives to hog producers to exit the industry. However, due to strong prices, producers are reluctant to liquidate herds.

RUSSIA

USDA/FAS reports that the Russian economic crisis has had a favorable impact on the domestic poultry industry, although consumption is declining because imports have slowed and the domestic industry cannot supply the shortfall. Poultry meat consumption declined by 35 percent in 1998 compared with the 1997 level and is expected to decline by another 17 percent in 1999. Total consumption is forecast at 1.205 million metric tons for 1999 (compared with consumption of 1.855 million metric tons in 1997), and imports are forecast at 500,000 metric tons (compared with imports of 1.24 million metric tons in 1997).

The economic crisis is apparent in the cost of meat products and food staples. Since mid-1998, the retail price of meats in rubles has doubled, whereas average monthly income has declined from U.S. \$160 to U.S. \$50 (not indexed for inflation) since July. With the devaluation of the ruble, inflation, job cuts, and reduced foreign investment, consumer purchasing power has declined significantly. Since the onset of the economic crisis in August, meat consumption reportedly has fallen below their established dietary guidelines as consumers switch to crushed grain, eggs, dairy products, and semi-finished meat products, and the Russian State Dumas has discussed price controls as a way to curb the inflation of food prices.

Spurred by a good grain harvest in 1997, increased demand due to decreased imports as a result of the economic crisis, foreign investment, and government support in the form of financial credit, poultry meat production totaled 640,000 metric tons in 1998 and is forecast to reach 720,000 metric tons in 1999. Although many operations remain uncompetitive and economic problems limit improvements, vertical integration is gradually increasing the overall competitiveness of the Russian poultry sector. The Russian government has adopted a resolution calling for a 250,000 metric ton increase in production. At the same time, the Russian poultry industry is attempting to convince consumers that U.S. poultry meat is inferior to domestic product.

BRAZIL

The Brazilian poultry industry is forecasting 1999 exports to show a 10 percent increase, to 692,000 metric tons. Lower production costs are expected to improve producer returns and domestic consumption is expected to remain strong as poultry meat remains price competitive with beef. The poultry industry is implementing an international market promotion program with a target of \$1.2 billion in annual poultry meat exports by 2002.

HONG KONG

The economic crisis in Russia softened world poultry meat prices and resulted in the diversion of large volumes of poultry meat to China via Hong Kong. As a result, Hong Kong's poultry meat imports reached an estimated 868,000 metric tons in 1998. Although anti-smuggling campaigns by the Chinese government and a less favorable exchange rate for the Chinese Renminbi may continue into 1999, heavy trading is expected to continue and Hong Kong's poultry meat imports are forecast to increase to 937,000 metric tons. Seventy percent of imported poultry meat was re-exported during January-September 1998.

<u>JANUARY-SEPTEMBER 1998.</u> USDA/FAS reports the following re-exports of chicken meat, by cut.

JanSept. 1998	Imports	Exports	Re-exports
Chicken Cuts	(metric tons)	(metric tons)	(percent)
Feet	258,160	209,690	81
Wings	183,670	124,373	68
Frozen cuts	121,229	80,612	66

NATIONAL YOUNG TURKEY PARTS AND BULK MEAT, FROZEN (UNLESS SPECIFIED), CENTS PER LB., DELIVERED FIRST RECEIVERS, PART AND FULL TRUCKLOTS

MAY 07, 1999

Tom drum undertone improved with increased activity noted for domestic and export shipments. Thigh meat market fully steady with the strength due mostly to export interest, however, some increased fresh domestic inquiry is noted. The overall dark meat undertone is being helped by the strength of the chicken leg quarter and pork complexes. Offerings of 4-8 lb. breasts light to instances adequate with some processors reluctant to cut up hens due to the profitability of bagging operations. Grade A rib breasts: 8-10 lb. 104, 16-18 lb. 145-150 cents delivered. For export: hen drums 19, hen defatted gizzards 51 cents delivered.
